FRAMEWORKS AND SKILLS

Agile/SCRUM   AWS   Express   Node.js

Communication   Teamwork   Problem-Solving

React   CSS   Bootstrap   User-Centered-Design

PROJECTS

EnvironMate (Front End Lead) (06/2019 – 08/2019)

- In a team of 6, we developed an environmental reporting/viewing web application deployed on AWS. A user was allowed to take a picture of an environmental defect and post on our website. We used google maps API to pinpoint location when a user posted. User was allowed to browse other posts and write comments. We used AWS, node.js, express, MySQL, google analytics, react and bootstrap.

HitMe 21 (Front End Lead) (06/2019 – 08/2019)

- In a team of 5, we developed a multiplayer blackjack web application deployed on AWS. A user was allowed to sign up or log in and play blackjack vs computer; multiple users were allowed to log in and play each other with live betting. A private and global chat was also implemented. We used AWS, NGINX, Daphne, MySQL, Python and Django.
